

INGOT MOULDS

CAST IRON AND CAST STEEL INGOT MOULDS FOR ALUMINIUM AND ZINC

Pyrotek cast iron or cast steel ingot moulds are designed for remelt casting of aluminium or zinc ingots. The moulds are reusable and can be customized to project specification drawings and requirements.

The mould's useful life depends on the total kilograms cast, mould maintenance and coating.

BENEFITS

- Local delivery available
- Manufactured to meet specific project requirements
- Full quality control reports, batch data and lot traceability information are available

APPLICATIONS

- Casthouses
- Smelters
- Remelt plants
- Aluminium and zinc industries
- Cast remelt ingots
