

EXTRUSION LOG FURNACE LININGS

PRECAST REFRACTORY OR MACHINED CF BOARD LININGS

Pyrotek supplies parts for extrusion log furnaces ranging from precast or machined refractory burner tiles and blocks, to complete replacement sections (including steel shells).

APPLICATIONS

- Precast refractory or ceramic fiber tiles and blocks
- Cast-in-place refractory replacement linings
- Complete finished furnace modules
- Backup insulation

BURNER TILES / BLOCKS

- Precast refractory—These are cast to the dimensions specified by the customer. Pyrotek has a wide range of refractories to choose from.
- Machined ceramic fiber—These are machined from thick high-temperature ceramic fiber board to meet customer specifications.

REPLACEMENT LININGS

- Pyrotek can reline your log furnace sections using castable refractory and / or ceramic fiber board.

FURNACE MODULES

- Pyrotek can fabricate complete replacement modules for your log furnace.

Note: The physical and chemical properties listed represent typical, average values obtained in accordance with accepted test methods and are subject to normal manufacturing variations. They are supplied as a technical service and are subject to change without notice.
