

D- AND S-SERIES PUMPS

CENTRIFUGAL PUMPS FOR GALVANIZING BATH SOLUTIONS AND DEEP PUMP-OUTS

Pyrotek D- and S-Series Pumps are all-metal centrifugal pumps designed for pump-out, emergency pump-out, and alloy change applications in the galvanizing and lead industries. These pumps are available in different flow output and metal head performances, sizes and motor sizes, and can be tailored to suit individual project specifications.

BENEFITS

- High operational reliability
- Easy, simple installation
- Excellent resistance to impact loading
- Minimal pump preheating required
- Excellent head flow capacity
- Proven high-performance technology
- Limited number of parts requiring replacement

FEATURES

- Pumps available:
 - D-13SD, D-13XL, D-13XD
 - S-700, S-1600, S-3000
- Operating metal heads up to 5 metres (16.4 feet)
- 6, 10 and 15 horsepower motors available depending on the type of pump

APPLICATIONS

- Pump-outs
- Emergency pump-outs
- Alloy changes
- Batch galvanizers
- Continuous galvanizers
- Used as a snout-pump (D-13 series)

**D- and S-Series Pumps
1400 RPM**
