

DRY FILM LUBRICANT

Slip-Plate dry film lubricant is manufactured by Superior Graphite Company and available to the aluminium industry exclusively through Pyrotek. The easy-to-use aerosol bonds to any clean metal, wood, concrete, and most plastic surfaces. Slip-Plate forms a dry-film surface which will not gather dirt, dust, or rust. It is unaffected by temperatures from approximately -59–232°C (-75°F–450°F), and will not melt, freeze, wash-off or gum. Slip-Plate is resistant to most chemicals and solvents. The graphite-based product will conduct electricity, and it is not intended for use near electrical connections or areas prone to electrical malfunctions.

APPLICATIONS

- Dies and molds
- Fork lifts and cranes
- Conveyors, chutes, rollers, and pulleys
- Tough-wear friction environments

ADVANTAGES

- Easy-to-use
- Quick-drying
- Long-lasting, durable coating
- Working temperature range: -59°C–232°C (-75°F–450°F)
- Reduces friction
- Prevents parts wear
- Lead-free
- Nonpolluting and environmentally safe

AVAILABILITY

Spray cans:
142 g (5 oz)
340 g (12 oz)
