

Quick Tip Thermocouples

Developed for high accuracy and long operational life, Pyrotek Quick Tip thermocouples offer rapid and accurate response times in a compact, lightweight design. A proprietary coating on each thermocouple tip protects the surface sheath without diminishing response time.

Pyrotek Quick Tip thermocouples are a reliable temperature-sensing solution in various aluminium applications such as scheduled temperature checks in potlines, spot and continual metal temperature checks and temperature monitoring in casting tables, head boxes, and transfer troughs throughout the casthouse.

Benefits:

- Accuracy of 0.4 percent or better
- Fully protected thermocouple wire
- Each unit has full manufacturing traceability
- Hermetically sealed thermocouple element
- Handheld lance

Why Pyrotek?

Pyrotek's global network of application engineers work with aluminium operations to determine the most optimal thermocouples and protection tubes to suit their needs.
