

EG-135 RELEASE AGENT

INGOT AND SOW MOULD RELEASE AGENT

EG-135 is a carbon-based release agent for ingot and sow moulds. It is resistant to metal erosion from ferrous and nonferrous metals, including iron, steel, aluminium, copper, zinc, brass, magnesium and their alloys. It can also be used for dross pans and skimming tools.

BENEFITS

- Prevents aluminium adhesion
- Metal erosion resistant
- Economical
- Easy spray or brush application

APPLICATIONS

- Ingot moulds
- Sow moulds
- Dross pans
- Troughs
- Skimming tools

USE INSTRUCTIONS

1. Dilute the agent with water to reach the required viscosity.
2. Apply with a brush or a sprayer.
