

PYROCUT X-2

HIGH-PERFORMANCE LUBRICANT

Pyrocut X-2 is a fully synthetic, high-performance lubricant used with circular and band saws in aluminium billet casting and extrusion operations. The lubricant is used for general machining and fabrication processes.

Pyrocut X-2 does not contain petroleum oil, heavy metals, chlorine, sulphur, phosphorous, silicone, volatile organic compounds (VOCs) or hazardous materials. It is made from renewable organic materials and is completely biodegradable.

BENEFITS

- Provides excellent lubricity to all saw blade designs, and results in improved blade life and cleaner cuts
- Does not stain or discolour extruded surfaces
- Odourless and non-irritating to skin
- Cleans up easily, does not leave a sticky residue

USE INSTRUCTIONS

Use an airless sprayer, mister, pad, drip or roller coater to control the application of Pyrocut X-2.

PHYSICAL PROPERTIES

Property	Value
Physical Appearance at 30°C (86°F)	Clear liquid
Acid Value	1.0 maximum
Flash Point	>163°C (325°F)
Viscosity—CST at 40°C (104°F)	10
Pour Point	0°C (32°F)
