

## In-line Degassing Gaskets

Pyrotek offers in-line degassing gasket seals that meet an aluminium operation's required temperature resistance, sizes, density, and durability. The gaskets are available as ropes in single or double braid, embedded into high-temperature fibreglass fabric. Gaskets are available in many densities, thicknesses, and heat tolerances.

### Benefits:

- Low cost
- Precut to exact dimension
- Molten aluminium resistant
- Refractory ceramic fibre and refractory ceramic fibre-free material available

### Why Pyrotek?

Pyrotek® is a global engineering leader and innovator of technical solutions, integrated systems and consulting services in the aluminium industry. Our global network of application engineers can help you determine the best materials, products, and designs to suit your needs.
