

ANODE BAKE FURNACE PEEP AND PORT COVERS

ANODE BAKE FURNACE SEALING AND INSULATION

Pyrotek Anode Bake Furnace Peep and Port covers provide excellent peep and port hole sealing and insulation. The covers contain quality material, have unique designs and extended product life.

The covers are available in welded and fully drawn designs. The welded cover contains a bottom plate that is secured with a curved lip. The plate eliminates insulation falling into the furnace due to weld failure. The drawn cover completely encapsulates and protects the insulation without the weld or bottom plate requirements.

BENEFITS

- Complete seal
- Increased furnace efficiency
- Long product life reduces maintenance
- Refurbish and repair services available

PROPERTIES

Material	310 Stainless Steel
Insulating Layers	Multiple ceramic fiber high-temperature insulation rope
Side Base Thickness—mm (in)	3 (0.12)
Bottom Plate Thickness—mm (in)	4 (0.16)
Dimensions	Custom Designed
